

TrendGuru AI

High Profit  
Trading Signals

## TECHNOLOGY

Our artificial intelligence technology is designed specifically to generate profits in the financial markets. The technology is based only on pure mathematics and the latest developments in the field of self-learning systems. A huge amount of historical data has been used to test the system, and it performs perfectly in real time.

## EXPERIENCE

The development is handled by a multidisciplinary team with exceptional technical expertise and rigorous risk management practices. Our team includes the best programmers, mathematicians and economists. With an average experience level of 15 years or more among our experts in their field, you can achieve high profitability without excessive risk, even in highly volatile markets.

## STRATEGY

Our strategy gives high profitability not only in growing but also in falling markets. The system analyzes and gives signals for dozens of instruments for maximum risk diversification. Risk management meets the highest industry standards. With the technology, you can have the best analysts, programmers, and risk managers working for you. All you have to do is to follow the advice and get income. This is the best way to trade the markets.

Our strategy was built based on the many years of experience of the world's best hedge fund managers. Thanks to our technology, this experience is now available to you. With our signals, you can take advantage of any market condition and get high returns. Artificial intelligence offers the best solutions without you having to guess or be nervous.

The trading strategy can have simultaneously long and short positions in different assets on the spot or futures markets. The model is based on probability theory, technical analysis, cycles theory and the law of large numbers. All signals are mathematically and statistically valid. The presence of such signals for you will be equivalent to 25-30 years of experience in trading in the financial markets.

The cryptocurrency market is without a doubt the most promising market for many years to come. Using the capabilities of our artificial intelligence, you can take advantage of all the benefits of the crypto market. High volatility will no longer be a problem for you, and will be an advantage. The artificial intelligence system has been developed over the course of five years and has shown amazing results.

### WHAT IS THE STRATEGY IMPLEMENTATION?

Just do what our artificial intelligence tells you to do. You get profit from trading a huge number of instruments in the cryptocurrency market. We buy when the market rises and sell short when the market is weak. Thus, you can get profitability in any market conditions. And remember - artificial intelligence is smarter and more reliable than any human. Especially in combination with institutional grade risk management system and procedures.

### CAN YOU SUMMARISE WHY I SHOULD CONSIDER THE TRENDGURU AI SIGNALS?

Our strategy is all about harnessing the main attributes of crypto market returns. We did our best to make cryptocurrency trading not a difficult test, but profitable and stable business. As such, we providing a smart passive income vehicle and an effective portfolio diversifier. All members of our team manage their capital using our system. There is no doubt it, so you can be confident of it as well.

### WHY NOT JUST BUY AND HODL BITCOIN, FOR HIGHER RETURNS?

As part of a healthy diversified portfolio, you should do exactly that! Our technology is not designed to compete or outperform Bitcoin. It is ,by design, a low-risk source of absolute returns. If you just hold Bitcoin, then your capital grows and falls with it. Waking up one morning, you can see that your capital has decreased by 50% - 70%. This is unacceptable if you want to control your capital. Our bot will allow you to avoid such troubles and sleep peacefully.

### BASED ON WHAT ARE YOUR SIGNALS FORMED?

We use proven methods of technical analysis, main theorems of probability theory, cyclical patterns and behavioral economics models. All this, combined with a huge set of technical indicators, allows our artificial intelligence to make high-quality decisions. Of course, 100% signal accuracy is not achievable, but the accuracy of our signals is sufficient to achieve amazing results in the market.

01

### HUGE PROFIT

+979000% total profit since inception.  
+ 846,5% average yearly gains.  
92% profitable months.

02

### LOW RISK
